

confinement till the review process has been completed and how long would that take?

SENATOR CHAMBERS: Well, on the good time, that's easy. That would be reinstated.

SENATOR MOORE: Okay.

SENATOR CHAMBERS: On the placing in solitary confinement, to be frank about it, maybe once they initiate their review they could make a showing to the court that no action should be taken on this particular type of discipline, because if you allow the imposition of the discipline...

SPEAKER BARRETT: Time.

SENATOR CHAMBERS: ...then you could have served it unjustifiably, but that would be handled through the judicial process with the court.

SPEAKER BARRETT: Thank you. Senator Haberman, please.

SENATOR HABERMAN: Mr. President, members of the body, there is another issue that I think should be discussed. The bill states that any hearing pursuant to the sections in this bill shall be taped, they shall be taped and the tape kept for six months. So I'd like to raise this question for you or to you. City councils, county boards, school boards, NRDs, I do not know of any other government entity where by law they have to tape their meetings, so I would say that this is going a step too far, as if we're going to go out to the penitentiary and say any hearings have to be taped and we should take that extra step and say that any appeal to any zoning law, anything else that comes from the county board, the city council or appeal to the school board has to be taped. So I think we're reaching way out on that one. Then to close, and not get into an argument, I'll let Senator Chambers address what I'm going to say, it seems to me as if we say to the inmate that, boy, if you lose your good time or they take you off of work release or they put you in confinement, you can appeal. Well, those are three very stringent things. That's what you might call control over someone and say this is what we're going to do if you essentially foul up. Now I just saw in the paper the other day where there is a big business in Lincoln making cement solitary confinement cells by the hundreds. So, I say, what are we going
